DIONISIUS SURYA JAYA

Temanggung, Central Java dionisius.suryajaya@gmail.com 082145688609 Portolio Website Github

SUMMARY

Graduated Computer Science student at Universitas Brawijaya (GPA: 3.58/4.00) specializing in Machine Learning, Computer Vision, and Data Analytics pipelines. Proven experience building end-to-end ML workflows, NLP text classifiers, and statistical dashboards. Proficient in Python, Scikit-Learn, YOLOv11, Pandas, and SQL/relational data models.

EDUCATION

Brawijaya University Bachelor • 3.58

Computer Science Malang, East Java, Indonesia • 2022 – 2026

EXPERIENCE

MEDEVA Malang, East Java, Indonesia

Machine Learning Intern Jan 2026 – May 2026

- Engineered end-to-end clinical risk stratification pipeline processing BPJS healthcare records.
- Implemented NLP classification pipeline (TF-IDF + Logistic Regression) for Hypertension risk detection.
- Applied unsupervised K-Means clustering on clinical metrics to segment Diabetes Mellitus patient risk profiles.
- Deployed interactive diagnostic web app on Streamlit, reducing clinician record assessment time.

BPS (Badan Pusat Statistik) Kota Malang Malang, East Java, Indonesia

Data Analyst & Frontend Developer Sep 2025 – Nov 2025

- Validated, cleaned, and standardized municipal socioeconomic datasets from 10+ regional agencies.
- Built automated data processing scripts in Python/Excel to parse consumer price index spreadsheets.
- Engineered interactive analytics dashboard modules for civil servants and regional researchers.

MMD FILKOM Universitas Brawijaya Malang, East Java, Indonesia

Geospatial Data & Backend Support Jul 2024 – Aug 2024

- Digitized administrative boundary and infrastructure layers using QGIS and ArcGIS.
- Developed interactive WebGIS platform using Leaflet.js to visualize geospatial land-use distribution.

Coding Camp by DBS Foundation Malang, East Java, Inodnesia

Full-Stack Web Apprenticeship Feb 2025 – Jul 2026

Developed modern, mobile-first responsive web apps in an agile team workflow. Implemented client-side caching, component modularity, and integration with third-party RESTful services.

PROJECTS

Clinical Risk Stratification Engine 2026

- Developed predictive risk-scoring system on real-world clinical records with data cleaning and imputation pipelines.
- Evaluated models using Precision, Recall, and ROC-AUC metrics to ensure healthcare baseline compliance.

Live Demo

License Plate Recognition System 2026

- Trained YOLOv11 object detection model on custom Indonesian license plate dataset, achieving 95% mAP.

- Integrated bilateral filtering and CLAHE preprocessing pipelines to enhance plate character legibility under varied lighting.

- Built real-time inference pipeline handling both static image uploads and video streams.

Repository

GitHub Star Notes & Knowledge Engine 2026

- Built personal metadata search engine and Chrome Manifest v3 extension for indexing developer tools.
- Designed schema with SQLite/Prisma for sub-50ms local querying and full-text keyword search.

Repository

TECHNICAL SKILLS

Languages

Python, SQL, TypeScript, JavaScript

ML / AI & Data Science

Scikit-Learn, YOLOv11, OpenCV, NLP (TF-IDF), K-Means Clustering, Pandas, NumPy

Web & Backend

Next.js, Node.js, RESTful APIs, SQLite, Prisma, Git, Docker (Basic)
